PROFESSIONAL SUMMARY

Experienced Network Engineer with over 3 years in network security infrastructure, escalation support, and administration. Proficient in managing complex network environments, including routers, switches, firewalls and servers hardening, with a strong focus on ensuring high availability and reliability. Skilled in maintaining enterprise-wide network across muti-platform environments and high-uptime data centers in Singapore and Myanmar. Adept at conducting root-cause analysis and troubleshooting to resolve performance issues efficiently. Holds CompTIA Security+, CCNA, plus a Bachelor of Science in Cybersecurity and Networks from MDIS Singapore.

CERTIFICATIONS

CompTIA Security+ *2026*
Palo Alto Networks Certified Network Security Fundamentals *2026*
Fortinet NSE 3 Network Security Associate *In progress*
AWS Security Fundamentals *2025*
Cisco Certified Network Associate (CCNA) *2022*

WORK EXPERIENCE

ZTE Corporation | Thailand

Network and Security Engineer *November 2025 - Present*

- **Server Hardening:** Applied hardening standards across 200+ production servers, configuring SSH key authentication, disabling unused services, enforcing password policies, and restricting file permissions to eliminate common attack vectors.
- **Vulnerability Assessment and Reporting:** Ran advanced Nessus scans across production servers, configuring scan policies to assess service exposures, missing patches, and misconfigurations, then exported PDF and HTML reports for the AIS Thailand project team to support remediation before server handover.
- **Security Documentation:** Authored alarm integration procedures and server hardening records for UAT reports, used as operational standards across site implementation teams.

Campana Group Pte Ltd | Singapore

Network Engineer *May 2023 - December 2023*

- **Secure Routing and Switching:** Configured VLANs and VPNs and tested BGP across multi-site environments to control traffic flow and isolate network segments according to security policy.
- **Data Centre Operations:** Deployed and maintained Cisco, Juniper, and Gigamon devices inside Equinix SG1 and Telin-3, patching Cat6A, OM4 fibre, and DAC cabling while maintaining physical security and cable management standards.
- **Incident and Escalation Management:** Supported 24/7 Layer 1 and Layer 2 operations, troubleshooting network faults, escalating to vendors including Singtel and MPT, and documenting resolution steps in the ticketing system.

One Cloud Technology | Myanmar

Network Engineer *March 2021 - February 2023*

- **Network Deployment at Scale:** Deployed and secured FTTH networks across 50+ Ooredoo retail sites using Cisco access points and MikroTik switches, applying VLAN segmentation to isolate customer traffic from management traffic.
- **Multi-Site BGP Routing:** Configured and maintained BGP routing across 35+ Heineken production facilities for controlled route advertisement and stable connectivity between distributed zones.
- **Operations and Ticketing:** Managed L1 and L2 incidents through a structured ticketing system, escalating unresolved issues to senior engineers and keeping accurate resolution records.

EDUCATION

Bachelor of Science in Cybersecurity and Networks (with Honours)
Management Development Institute of Singapore (MDIS) | 2025

TECHNICAL SKILLS & LANGUAGE

Firewall
Palo Alto | Fortinet

Protocol
BGP | OSPF | STP | TCP/IP | IPsec | MPLS |VPLS

Operation Systems
Linux | Windows | MacOS
